## Price Guide 2024

Every survey is different and you should always get in touch with us to discuss your specific requirements and costs, but here are some illustrative figures to get you started.

Let's assume that the vessel is a 35' sailing yacht.

|  |                              |
|--|------------------------------|
| Pre-purchase Condition Survey            | From £560                    |
| Insurance Survey                         | From £490                    |
| Damage or structural surveys             | From £50 per hour            |
| Valuations (following survey)            | From £100                    |
| World Sailing Keel and Rudder Inspection | £225                         |
| Aluminium surveys                        | Add £100 for thickness gauge |
| Engine oil analysis                      | Add £60 per engine           |
| Diesel Fuel analysis                     | Add £40 per engine           |
| Sea Trials (powerboats)                  | From £70 per hour            |
| RIB surveys                              | From £150                    |

We are based in Gosport and do not charge for travelling between Lymington and Chichester, unless additional journeys are required. Travel to the Isle of Wight is charged 'at cost'.

The client is responsible for arranging (and paying!) for the vessel to be lifted where necessary.

For surveys outside the Solent area, travelling by road will be charged at £0.40 per mile. We do not charge for travelling time.

Travelling overseas, or remaining at the site overnight will be charged as 'actuals' and agreed in advance. We will always try to travel by the most cost-effective means.

We do not charge VAT.
